

Brunswick – Glynn County Joint Water & Sewer Commission

March 6, 2018

**PROJECT: IFB – CCTV Camera Inspection
2016 SPLOST N Mainland Phase II and Phase III Downstream
Assessment**

ADDENDUM: Two (2)

DUE DATE: Tuesday, March 13, 2018 - NOON

THIS ADDENDUM IS FOR THE PURPOSE OF MAKING THE FOLLOWING CHANGES OR CLARIFICATIONS:

- 1) The specification document states categorically that the 6,000 linear feet of sewer to be inspected is 30 inch diameter RCP, but the bid tabulation sheet says up to 30 inch. What other size option may be included?
 - Staff understanding is that 30 inch is all that is present, however that cannot be definitively confirmed.

- 2) TISCIT is a reasonable options for pipe of this size and flow; would BGJWSC consider this as an option or an alternate instead of just CCTV or Laser?
 - TISCIT: Total Integrated Sonar and Camera Inspection Technique. This would be an acceptable alternate or option, but is not required.

- 3) If a bidder chooses not to bid the Alternate Bid Items on the revised Bid Tabulation sheet, will the bidder be penalized or deemed non-responsive?**
- **No, there will be no penalty levied and no non-responsive designation if a bidder does not elect to bid the Alternate items. BGJWSC included the Alternate items to determine if they are within out project budget.**
- 4) There are no bid items for sewer cleaning, removal of roots, protruding taps or gaskets, etc. Is the objective therefore a condition of this line to NASSCO PACP format?**
- **BGJWSC is specifically asking only for condition assessment. Absolutely no cleaning is to be attempted at this point.**

All applicants under this Request For Qualifications are kindly requested to acknowledge receipt of this Addendum in original only.
