

BRUNSWICK-GLYNN COUNTY JOINT WATER & SEWER COMMISSION

April 22, 2019

PROJECT: RFP No. 19-012 – Engineering Design 2019 Water Pollution Control Facilities Rehabilitation for Academy Creek & Dunbar Creek – Project No. 806 for the BGJWSC

ADDENDUM: Four (4)

DUE DATE: ~~TUESDAY, APRIL 16, 2019, 12PM NOON, EST~~
TUESDAY, APRIL 30, 2019, 12PM NOON, EST

THIS ADDENDUM IS FOR THE PURPOSE OF ANSWERING THE FOLLOWING QUESTIONS:

- 1) **QUESTION:** The Indemnification Clause in the RFP (Para 8.0) is inconsistent with OCGA 13-8-2, in that it does not limit our indemnification to the extent to which such claims are caused by our negligent performance under the contract. Will the indemnification clause in the contract be written to be in conformance with State Law, as stated in item 6.0 Governing Law in the RFP?

ANSWER: Yes, the contract will be written in accordance and compliance with State Law regarding indemnification. A proposed contract can be found at the following link: <https://www.bgjwsc.org/rfp-no-19-015-engineering-design-2019-water-pollution-control-facilities-rehabilitation-academy-creek-dunbar-creek-project-no-906-for-the-bgjwsc/>

- 2) The RFP has no mention of the requirement for Professional Liability Insurance (PLI). Please advise what, if any, PLI coverage and terms will be required in the contract. Also, if PLI is required, please confirm that we are

required to attach to our proposal both our Professional Liability Insurance Certificate and the Certificate of Insurance form included in the RFP.

ANSWER: You will need to include both the PLI Certificate as well as the Certificate of Insurance form in the RFP with your submitted proposal. A copy of the BGJWSC Insurance Requirements can be found at the following link: <https://www.bgjwsc.org/rfp-no-19-015-engineering-design-2019-water-pollution-control-facilities-rehabilitation-academy-creek-dunbar-creek-project-no-906-for-the-bgjwsc/>

- 3) **QUESTION:** It is the understanding of this Engineer that the BGJWSC would like to relocate Operation and Laboratory space to the 2nd floor of the existing DAF/Dewatering building. Is there a pre-programmed square footage for both Operations and Laboratory space that will be moved?

ANSWER: There is no pre-programmed size requirement. There will need to be sufficient room for the water and wastewater laboratory to house their equipment with work space, as well as room for Emergency Operations work stations to be included in the Operations area.

- 4) **QUESTION:** The Summary Fee Sheet for Academy Creek does not include the Effluent Filters (Scope Item A.5). The Dunbar Creek Summary Fee Sheet does not include the Odor Control Improvements (Task B.2). Additionally for both facilities, the summary fee sheets are organized differently than the scope items. Should we organize our scope in accordance with the items as presented under Section 4 – Scope of Services or as presented in Proposal Summary Sheet? As it is presented now, once a proposer is selected the not to exceed fee will differ in how the work is organized in the Scope Items. Would BGJWSC consider revising the summary sheet to match the scope items?

ANSWER: The Summary Fee sheets for each plant have been updated. Please use the following link to access the updated Fee sheets: <https://www.bgjwsc.org/rfp-no-19-015-engineering-design-2019-water-pollution-control-facilities-rehabilitation-academy-creek-dunbar-creek-project-no-906-for-the-bgjwsc/>

- 5) **QUESTION:** The answer to question 16 in Addendum 2 states that a Categorical Exclusion Request and Preliminary Engineering report has been submitted to GAEPD. A Design Development Report (DDR) will also be required. Should we include the report preparation in the scope or is the DDR being prepared by someone else?

ANSWER: Please include the preparation of the DDR in your scope.

All applicants under this Invitation for Bid are kindly requested to acknowledge receipt of this Addendum in original only.
