

Facility Construction Project Photos – January 2023

2106 DUNBAR CREEK WPCF REHAB (IN PROGRESS-TBD)

1. Northwest Drone view of the ongoing construction activities at the Dunbar Creek Treatment Plant.
2. Contractor team member (BRW Construction Group) performing underground utility locating by potholing method.
3. Potholing method, sometimes referred to as Daylighting, is one of the essential investigative construction techniques used to expose the horizontal and vertical location of utility lines. The purpose of potholing is to gain onsite confirmation of the location of utilities and any other existing structures that are in the proposed construction zone.
