

Facility Construction Project Photos – August 2024

#2105 PUMPSTATION 4044 REHAB (29% - OCTOBER 2024)

1. GA Power crew members are onsite and working on de-energizing the high-voltage line.
2. The tree stump was removed, and underground utilities were exposed and located in preparation for upcoming work to demolish the private wet well between Brake-4-Less and Prime South Bank.
