

Facility Construction Project Photos – November 2024

1. Drone view of the ongoing construction activities at PS4044.
2. View of the newly installed 10-diameter wetwell and top – existing wetwell to be demolished and existing sewer line to be connected into the new wetwell.
3. Drone view of the ongoing dewatering well point system activities.
4. View of the temporary sewer bypass pumping system in front of Brakes-4-Less.
